Massachusetts Buyer's Rights Disclosures

A copy of this disclosure must be provided to prospective students who are Massachusetts residents at least 72 hours prior to signing an enrollment agreement.

The Massachusetts Attorney General requires the following information be disclosed to all Massachusetts residents intending to enroll in private sector colleges and universities. The definitions and performance calculation methodologies used in this disclosure are dictated by the Attorney General and may differ from those commonly used by the U. S. Department of Education, our accreditor(s) and other state agencies. Consequently, the information presented here may differ from information displayed in other disclosures.

Program Costs

The following cost information is used to determine financial aid eligibility and may not represent actual out of pocket costs. For instance, the Estimated Room & Board Expense represents a federally required cost of attendance component used in determining financial aid eligibility. Commuting students often incur no additional housing costs with their enrollment.

Graduation Rate and Median Completion Time

The following chart reflects the percentage of students who were Massachusetts residents and graduated from a DeVry University program during 2021 and 2022. Graduation rates are impacted by the average length of time students are enrolled, transferred credit hours and enrollment intensity and, therefore, may not be suitable for comparing to other institutions. The graduation rates listed below do not factor in whether the student has been enrolled long enough to complete the program. When shown, n/a indicates that either the program had no enrollments or is too new.

Placement Rates and Employment Statistics

Massachusetts law requires schools to disclose graduate placement rates and employment statistics. DeVry University's institutional accreditor, The Higher Learning Commission, does not require the University to track, report or verify placement rates. DeVry University collects graduate employment information but does not verify employment therefore for the purpose of this disclosure, DeVry discloses a graduate placement rate of 0% for all programs. DeVry University provides career and employment-seeking advising and assistance. The use of the term "Placement" here does not imply that DeVry University places students with employers at the conclusion of their studies.

Your Loan Debt

Students are obligated to repay student loans borrowed to pay for this program, including interest. If you fail to complete or drop out of the program, you are still obligated to repay any portion of the student loan utilized to date. Failure to repay student loans can affect your credit, future earnings and student loan eligibility.

Loan Nonpayment Statistics

Massachusetts requires institutions to disclose a loan nonpayment percentage. The Massachusetts rate includes those students that were not required to make payments because they continued their studies, were active duty in the U. S. military, where physically disabled or qualified for deferral or forbearance under other terms as established by the U. S. Department of Education. In addition, the nonpayment percentage reflect the novel flexibilities applied to borrower accounts as initially prescribed in the CARES Act and subsequently extended by executive actions through August 31, 2023. As a result, payments are paused, collections are stopped, and interest is waived on all Department of Education-held student loans. Based on this flexibility a large percentage of borrowers are now in forbearance status under the special CARES Act forbearance which impacts the nonpayment percentage. The official 3-year federal cohort default rate for all institutions in 2019 was 2.3%. For DeVry University, the 3-year federal cohort default rate in 2019 was 2.3%.
